

Installation Wiring Diagram

Required Items

CCTV Camera

3 in 1 Premade Cable

Power Box

MIC

DC Power Cord

BNCM to RCAF

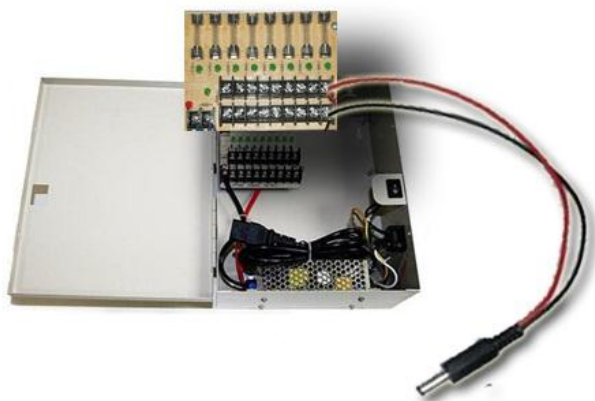

Camera Side Plug in

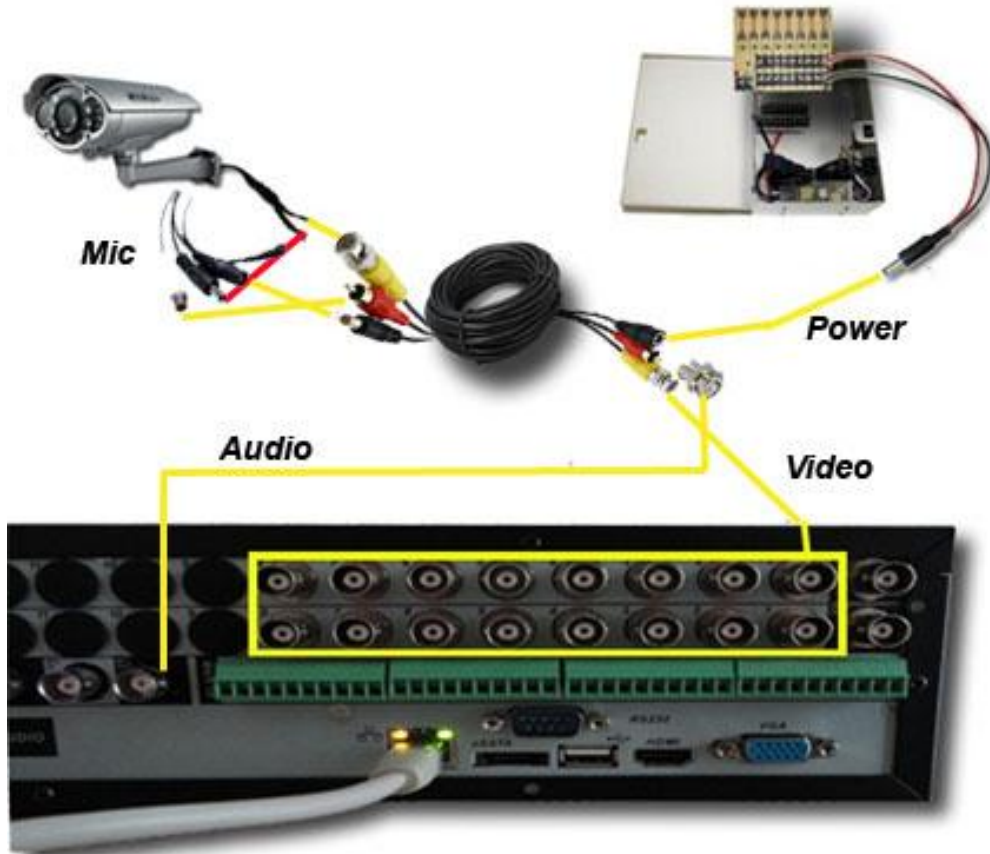

Once you have ran the cable and have the camera mounted, you must have the right fitting in the correct side. Audio will need a special converter plug to plug into the DVR BNCM to RCAF connector **(From Premade Cable BNC Male & DC Cord Male)**

Power Supply Input Screw Terminal

Male DC Cords are provided for easy plug and play connection from the power box to the Premade Cable. **Please Be SURE to plug the + with the + (red) and the – to the – (black).**

DVR Side Connection

Once you have completed the connection between the Screw terminal Power Box and the DC cord you can now simply plug in the Premade Cable into this DC Cord. The video then goes into the BNC input in the back of the DVR. The audio RCA with the BNCM to RCAF will plug into the BNC input for audio in the back of the DVR.
