

Pre-Made Cabling

- ▶ Every camera comes packaged with a male pigtail.
- ▶ The black wire of the pigtail is negative (-) and the red wire is positive (+).
- ▶ The power box has several terminals, each with a negative (-) and positive (+) side.
- ▶ Connect one pigtail per terminal, matching the negative (-) and positive (+) sides.
- ▶ Insert the male end of the pigtail into the female end of the pre-made cable.
- ▶ Plug the BNC video side of the pre-made cable into a video input on the back of the DVR.
- ▶ On the camera side, connect the power and BNC video ends to the camera harness.
