Trouble Installing SmartPSS on Windows
"Cannot Click Next on Installation"
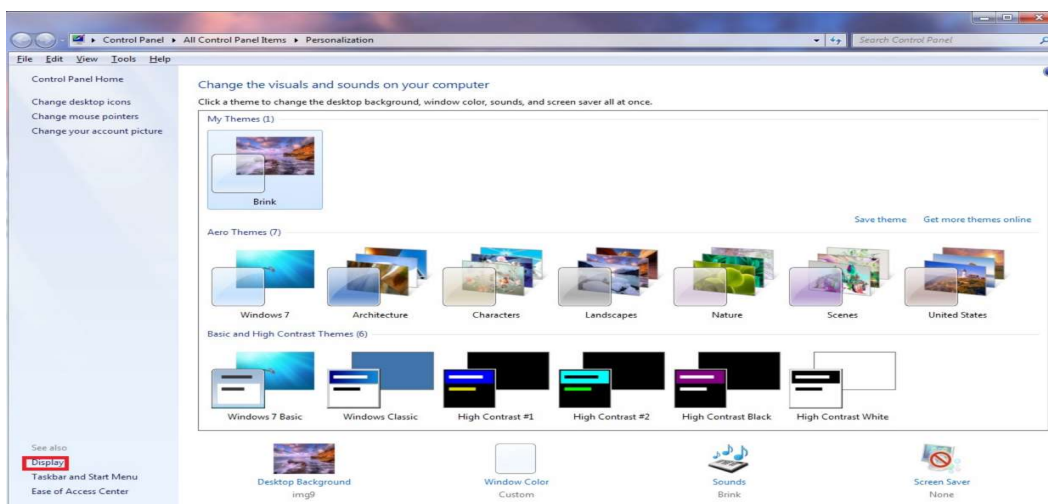

If you Display Settings are set too high your PC may not display the "**Next**" button after running the SmartPSS installation.

In order to resolve this issue you will need right click on your desktop and select "**Personalize**"

Click on "**Display**" on the bottom left of the screen.

Inside of the **Display** settings make sure your computer is set to **Smaller – 100%** and **Apply** these changes.

Once you have applied the changes you will have to either **Sign Out** of your user on your computer and **Sign In** or **Reboot** your computer.

Once you have logged back in try running the SmartPSS Installation again. The installation should be scaled properly showing you the **Next** and Cancel buttons seen below. Proceed with the installation.
